THE WORD EQUITAS

AEQUITAS

Aequitas is the Roman goddess of equity and fairness, often depicted holding a pair of scales. At times, she is shown also holding a cornucopia, which symbolises abundance and wealth. At Aequitas, we strive to conduct ourselves in a fair and equitable manner.

FOCUS AND PROFESSIONAL DISCIPLINE

WE AVOID

- Impulsive decisions
- Being influenced by financial news channels and platforms
- Acting on market movements
- Chasing winners or hot stocks
- Trading and short-term investments
- Derivatives

RED FLAGS

- Low promoter holdings
- Poor corporate governance
- High institutional ownership
- Leverage
- Fad / hot sectors
- Expensive valuations
- IPOs
- QIPs / Secondary equity sales

MULTIBAGGER APPROACH

GROWTH

The company has to be a growth company with above-average growth potential for the next 3-5 years. Markets reward a higher PE multiple for growth companies.

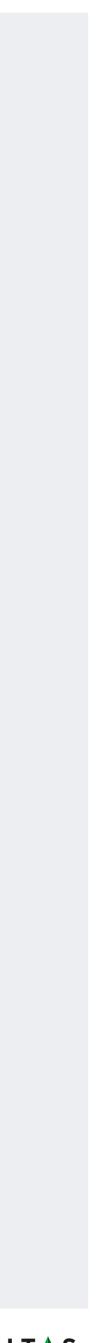

CONTRARIAN

Contrarian approach does not mean doing the opposite of others, rather, it means doing things differently. Buying in popular names will not provide multibagger returns.

VALUE

The valuation has to be reasonable. This is important because there has to be potential for re-rating. A combination of EPS growth and PE re-rating leads to multibagger returns.

ONGOING RESEARCH

PORTFOLIO CONSTRUCTION

We invest in quality companies with a focus on small and Mid cap growth companies.

Most market participants focus on price; we focus on company fundamentals.

We aim to construct a portfolio of around 20 stocks across various sectors.

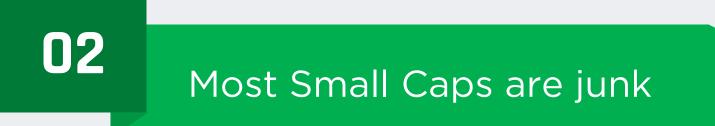

Invest with a 3-5 year horizon with a focus on low churn rate.

A value can remain a value for a long time. We actively look for catalysts that can lead to stock re-rating.

SELECTION CRITERION

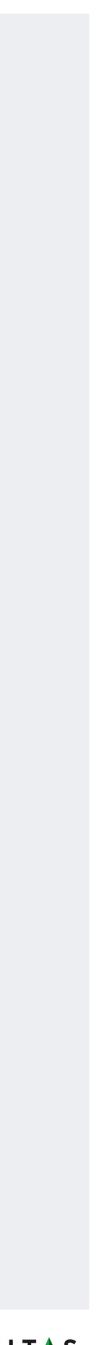

- Most of the companies in our portfolio are industry leaders with a strong sustainable competitive advantage
- Companies need to have very low debt levels and some of the companies are in fact net cash positive
- A good dividend paying record, corporate governance practices & a sound long-term performance record is a must.
- The portfolio PE ratio is lesser than market PE ratios (adjusted for cyclicality in earnings).
- Majority of our companies have done buy-back / creeping acquisition in the 12 months prior to our initial acquisition.
- Our portfolio includes companies with strong and consistent cash flow generation.

Risk is not a number, rather, it is a concept or notion. Risk equates to what Ben Graham called a "permanent loss of capital".

BALANCE SHEET RISK

The risk of an overleveraged balance sheet which is ignored during good times in favour of the cyclic high and unsustainable earnings.
